**Revolution Machine Works Equipment Services For  
HYDROMAT® Type Machines**

# HYDROMAT

Revolution Machine Works' (RMW) staff is comprised of former OEM Hydromat employees with over 30 years of experience. We are world class experts in the full rebuild practices, techniques, and retrofit services used in the Hydromat Type Rotary Transfer Machines—one of the few companies in the U.S. who do this!

# Hydromat Full Machine Rebuild And Turnkeys

# HYDROMAT

## DM2 HYDROMAT CNC UNITS

RMW is the first in the industry to offer DM2 CNC stand-alone ball screw add-on units on existing machines, as well as entire Hydromat-type machine upgrades to all ball screw units. Upgrading to true computer controlled CNC means no more hydraulic units and a true Servo ball screw rotary transfer machine. This allows customers to save time and money on Hydromat-type machines while upgrading to better performance.

- Ball Screw CNC Units for Rotary Transfer Machines Include:
- 1 Axis, 2 Axis, 4 Axis Capable
  - Stand Alone Control
  - No PMAC Boxes
  - Thru Coolant on all Units
  - High Accuracy Rigid Design
  - Plugs into Utility Plug
  - Program from any Computer
  - Units Currently in Production
  - USA based Parts & Support
